Brazil, São Paulo | Phone +55 11 9 7609-7382 | [lucas.pranevicius@aluno.ufabc.edu.br](mailto:lucas.pranevicius@aluno.ufabc.edu.br) | [LinkedIn Link](#)

## EDUCATION

---

### Federal University of ABC

*Interdisciplinary Bachelor's Degree in Science and Technology*

*Graduation Date: Dec 2026*

*Bachelor's Degree in Aerospace Engineering*

*Graduation Date: Dec 2029*

## WORK EXPERIENCE

---

### Gustavo Golveia Moldes

**São Paulo, Brazil**

*mechanical technician*

*2022 - 2023*

- Maintained optimal operation of thermoplastic injection machines by monitoring material levels, conducting quality analyses, and organizing raw materials and products inventory, resulting in a increase in production efficiency.
- Performed regular machine maintenance and troubleshooting tasks to minimize downtime and ensure continuous operation, resulting in a reduction in equipment failure rates.
- Collaborated with the logistics team to streamline material supply chains for injection machines, reducing lead times and improving overall production output.

### Dasa - Dianósticos da America

**São Paulo, Brazil**

*Laboratory Technician*

*2023 - 2024*

- Managed and optimized the biological sample collection sector, implementing Lean and Kanban methodology to increase efficiency.
- Maintained quality control procedures for all collected samples, resulting in a decrease in errors and customer complaints.

## PROJECT EXPERIENCE

---

### Harpia Aerodesign

**São Bernardo do Campo, São Paulo**

*Loads And Aeroelasticity Leader*

*Aug 2023 - Present*

- Analyzed and optimized load calculations for aircraft lifting and control surfaces, resulting in a 15% reduction in overall weight.
- Implemented advanced aeroelasticity analysis techniques to identify potential aeroelastic phenomena within the flight envelope, ensuring aircraft safety.
- Guided team members in conducting thorough aeroelastic analysis on multiple aircraft models.

### IEEE

**Santo André, São Paulo**

*Propulsion Research Team Leader*

*Jun 2023 - Jun 2024*

- Researched and developed a liquid bi-propellant engine for rocket propulsion, contributing to the IEEE-UFABC's goal of creating a more environmentally friendly and cost-effective hypergolic fuel for rockets.
- Effectively managed the administration of the Aerospace engineering chapter AESS-IEEE, coordinating meetings and partnerships.

## SKILLS

---

**Skills:** Microsoft Office (Excel, Word, PowerPoint); Adobe Photoshop, Adobe Illustrator, Matlab, Graphpad Prism, Python, SIEMENSfemap, Athena Vórtex Lattice, XFLR5

## CERTIFICATES

---

- **Lean Six-Sigma White Belt**
- **Lean Six-Sigma Yellow Belt**
